

[YFDC-Mini: A mini Fibre Distribution Closure](#)

Description

The Mini Fibre Distribution Closure is a high quality- high capacity closure designed to enable a fast, safe and fault-free installation. The closure benefits from a modular design that can hold up to 96 splices fitted onto up to 4 trays.

It can take up to 11 cables which can be sealed either through heat shrinkable sleeves or through cold seals (all supplied by Yaoz).

The closure's rugged design enables operators to install it on a wall, pole, underground or in a manhole.

This closure is IP68 certified.

The closure, like all of Yaoz Solution's closures, is made of Fortified Polypropylene for robust performance in all weather conditions.

Features

- Compact design: H 11.26 x W 11.26 x L 9.06 in (286 x 123 x 230 mm)
- Fits up to 4 mini trays
- Tray capacity of 12/24 splice holders per tray
- Total (closure) splice capacity: 96 splices
- Cables entry: the closure has 10 entries for round cables (up to 7mm) and one oval entry for cables up to 26mm.
- 2 optional sealing types: heat shrinkable sleeves or cold (gel) seal.
- Heat shrink sleeve option: sealing 2 cable entries in the oval port and one cable in each of the round ports.
- Installation options: The closure can be installed on a pole, wall, direct buried or in a manhole.
- UV resistant
